

Application: Stainless steel eyewashand shower safety station in stainless steel booth with single entry

This product is ideal for areas that contain sensitive equipment that cannot be splashed with water, as booth and door contain water from emergency shower while keeping the rest of the room dry. Especially useful in cleanrooms with perforated floors.

Shower Head: 26cm diameter stainless steel with 20 GPM flow control.

Shower Valve: DN20 stainless steel stay-open ball valve with stainless steel pull rod. Pulling down on pull rod activates shower; shower remains in operation until pull rod is returned to original closed position.

Spray Head Assembly: Two spray heads mounted on stainless steel supply arms. Each spray head has a "flip top" stainless steel dust cover, internal flow control and filter to remove impurities from water flow.

Eyewash Valve: DN15 stainless steel rotating plug-type valve.

Enclosure: type 304 stainless steel, three sided enclosure with door finish and welded seams.

Pipe and Fittings: All pipe and fittings are brushed stainless steel.

Supply: DN32 top and bottom female inlet.

Waste: DN32 female outlet.

Sign: ANSI-compliant identification sign.

Quality Assurance: Unit is completely assembled and water tested prior to shipment.
